★ **Issue 16777** **Nexus S PID 4E20 missing in android_winusb.inf (drivers v4)**

3 people starred this issue and may be notified of changes.

Status: Assigned

Owner: [r...@android.com](#)

Type: Defect

Priority: Medium

Reported By: Developer

Component: Tools

Subcomponent: Tools-usb-driver

[Add a comment below](#)

Reported by [borszc...@gmail.com](#), May 12, 2011

Lastest (as of today) driver do not list Nexus S. android_winusb.inf file lacks related entries. I had to manually add

```
;Google Nexus S
%SingleAdbInterface% = USB_Install, USB\VID_18D1&PID_4E20
```

to [Google.Nix86] section to make it work.

allow windows to identify the device driver for a device based on the USB ID of the device

Comment 1 by [webnet.a...@gmail.com](#), Jun 20, 2011

For a record (as it seems many people comes to this bug as 1st step): info on how to set usb tethering with Nexus S is here: <http://www.google.com/support/mobile/bin/answer.py?hl=en&answer=182134#wifi>

Comment 2 by [ralf%and...@qtempaccount.com](#), Jul 11, 2011

Hmm AFAIK Nexus S' PID is 4E22. What exact model do you have -- could that be the recent Sprint version? I'll ask if there's another PID floating around.

Summary: Nexus S PID 4E20 missing in android_winusb.inf (drivers v4)

Status: Assigned

Comment 3 by [borszc...@gmail.com](#), Jul 11, 2011

It's european, factory unlocked one (aka ROW perhaps).

Comment 4 by [ralf%and...@qtempaccount.com](#), Jul 11, 2011

Thanks, we tracked down this PID. I'll add it to the next version of the driver.

again.. r16..

Comment [9](#) by [Nigel.Ra...@gmail.com](#), Apr 18, 2012

Although one of the comments dated [July 2011](#) states that the 4E20 PID would be added as of April 2012 it is still not added. I guess this must be a very complicated and costly change indeed....

dates

not useful for localization
